DEPARTMENT OF INFORMATION TECHNOLOGY

2025-26

Head of Department's Message

It gives me immense pleasure to present ALTIORA, the annual magazine of the Department of Information Technology, Govt. Engineering College, Barton Hill.

A department is defined not only by its academic achievements but also by the ideas, aspirations, and accomplishments of its students and faculty. ALTIORA has been envisioned as a platform to celebrate these achievements while fostering a culture of learning, creativity, and innovation. Through its pages, we capture the milestones of the academic year, highlight the talents of our students, and showcase the vibrant spirit that defines our department.

The Department of Information Technology has always strived to create an environment that encourages intellectual curiosity, technical excellence, and holistic development. The achievements featured in this magazine, ranging from academic accomplishments and technical innovations to extracurricular successes, reflect the dedication, perseverance, and potential of our students. Equally important are the contributions of our faculty members, whose guidance and commitment continue to inspire and shape future professionals.

As technology continues to transform the world around us, it is essential that we cultivate not only technical expertise but also creativity, adaptability, and a sense of responsibility. I hope that ALTIORA serves as a source of inspiration for every reader and motivates our students to pursue excellence in all their endeavours.

I extend my sincere appreciation to the editorial team, faculty members, and students whose efforts have made this publication possible. May ALTIORA continue to document our journey, celebrate our achievements, and inspire future generations.

I wish ALTIORA every success in the years to come.

Dr. Deepthi Sasidharan
Head of Department
Department of Information Technology
Govt. Engineering College, Barton Hill

Message from the Faculty Editor

It is a matter of great pride to be part of ALTIORA. A department thrives not only through academic excellence but also through the collective achievements, ideas, and aspirations of its students and faculty. This magazine serves as a reflection of that journey.

Over the years, our students have consistently demonstrated their potential through academic accomplishments, technical innovation, research activities, and participation in various competitions and events. Their achievements showcased in these pages are a testament to their dedication, perseverance, and willingness to embrace challenges beyond the classroom.

As educators, our role extends beyond imparting knowledge. We strive to nurture curiosity, encourage critical thinking, and create opportunities for students to explore their interests and talents. It is gratifying to see these efforts reflected in the accomplishments documented in this magazine.

I congratulate the editorial team and all contributors who have worked diligently to bring this publication to life. May ALTIORA continue to inspire future batches of students to learn, innovate, and strive for excellence in every endeavour.

Josna V R
Faculty Editor

Message from the Faculty Editor

The true strength of a department lies not only in its academic accomplishments but also in the enthusiasm, creativity, and determination of its students. Every project undertaken, competition participated in, achievement earned, and idea explored contributes to a vibrant learning environment that extends far beyond the classroom.

The Department of Information Technology has always encouraged students to challenge themselves, embrace new opportunities, and pursue excellence in diverse fields. It is inspiring to witness our students continually pushing boundaries through technical innovation, research, leadership, sports, and other extracurricular pursuits. Their achievements reflect both individual dedication and the collaborative spirit that defines our department.

ALTIORA brings together many of these experiences and accomplishments, offering a glimpse into the talent, hard work, and aspirations of our students. More importantly, it serves as a celebration of the collective efforts of everyone who contributes to the growth and success of the department.

I congratulate the editorial team and all contributors for their sincere efforts in bringing this publication to fruition. May ALTIORA continue to inspire, encourage, and showcase the excellence that our department strives to achieve.

Prasanth R S
Faculty Editor

Editorial

It gives us immense pride and joy to present ALTIORA, the official magazine of the Department of Information Technology. Derived from the Latin word meaning "higher things" or "greater heights", ALTIORA stands as a reflection of the creativity, innovation, and intellectual spirit that define our department.

In an era driven by technology, the field of Information Technology continues to evolve at an extraordinary pace. As students and learners in this dynamic domain, we are constantly challenged to think critically, adapt quickly, and innovate fearlessly. ALTIORA is a platform that captures this very essence—bringing together thoughts, ideas, and expressions that go beyond textbooks and classrooms. Guided by its motto, Disce. Crea. Ascende. (Learn. Create. Rise.), the magazine celebrates a culture of continuous learning, creativity, and growth while encouraging individuals to strive towards greater heights.

This edition showcases a diverse collection of writings, including articles, poems, experiences, and reflections contributed by our students. Each piece carries a unique perspective, highlighting not only academic insights but also personal journeys, creativity, and social awareness. It is a testament to the fact that learning in IT is not confined to coding and algorithms, but extends to imagination, communication, and understanding the world around us.

We extend our heartfelt gratitude to all contributors, editors, and faculty members whose efforts have made this magazine possible. Their dedication and enthusiasm have transformed this vision into reality. As you turn these pages, we hope ALTIORA inspires you to think, create, and explore beyond boundaries. May this magazine serve as a reminder that every idea has the power to grow, and every voice deserves to be heard.

Govt. Engineering College Barton Hill: Rising Higher, Reaching Further

Govt. Engineering College Barton Hill (GECBH), Thiruvananthapuram, is one of Kerala's premier government engineering institutions, known for its commitment to academic excellence, innovation, and holistic student development. Since its establishment, the college has consistently nurtured talented engineers equipped with the knowledge, skills, and values required to meet the challenges of a rapidly evolving world.

Affiliated with APJ Abdul Kalam Technological University (KTU), GECBH offers undergraduate and postgraduate programmes across various engineering disciplines, supported by experienced faculty, modern laboratories, and a vibrant academic environment. The institution places equal emphasis on research, innovation, industry collaboration, entrepreneurship, and community engagement, enabling students to grow both professionally and personally.

The college has earned recognition for its outstanding academic performance, securing 4th rank among colleges under KTU with an impressive 85.12% pass percentage. This achievement reflects the dedication of its students, faculty, and staff in maintaining high academic standards and fostering a culture of continuous learning.

Beyond academics, GEC Barton Hill encourages students to participate in technical societies, cultural activities, sports, research initiatives, and social outreach programmes, helping them develop leadership qualities, creativity, and a strong sense of social responsibility.

With its unwavering focus on quality education, innovation, and integrity, Govt. Engineering College Barton Hill continues to empower young minds and shape competent professionals who contribute meaningfully to society and the engineering profession.

About The Department

The Department of Information Technology at Govt. Engineering College, Barton Hill stands as a dynamic and forward-thinking academic unit dedicated to excellence in technical education and innovation. Established in 1999, the department has steadily grown into a center of academic strength, producing skilled professionals who contribute to diverse sectors of the global IT industry.

From its inception, the department has focused on nurturing a strong foundation in computing, problem-solving, and emerging technologies. It offers a comprehensive B.Tech programme in Information Technology, along with postgraduate programmes in Network Engineering and Artificial Intelligence & Data Science. The department strives to provide a conducive learning environment that promotes academic excellence, innovation, research, and ethical values, preparing students to contribute meaningfully to society while meeting the evolving demands of the IT industry.

One of the defining strengths of the department lies in its commitment to academic excellence and innovation. Students consistently achieve top ranks in university examinations and go on to excel in higher education, research, and professional careers. The department also promotes entrepreneurial thinking by encouraging startup initiatives and creative problem-solving among students.

The faculty team comprises highly qualified and experienced educators, including Ph.D. holders and alumni from prestigious institutions such as IITs and NITs. Their expertise and mentorship play a crucial role in shaping students into competent IT professionals and responsible innovators.

Key Strengths

- Academic Excellence: Students consistently perform well in university examinations and secure top ranks.
- Highly Qualified Faculty: The department has experienced faculty members, including Ph.D. holders and graduates from premier institutions.
- Industry Readiness: Strong focus on practical learning, research, and skill development prepares students for real-world challenges.
- Strong Alumni Network: Graduates have secured positions in multinational companies, research institutions, government organizations, and have also established successful entrepreneurial ventures.
- Innovation & Entrepreneurship: The department encourages startup culture and creative problem-solving among students.

Facilities & Infrastructure

- Smart Classrooms: Equipped with LCD projectors, smart TVs, and digital teaching aids to support interactive learning.
- Computer Laboratories: Well-maintained laboratories with the software and computing resources required for practical coursework, programming, and project development.
- Seminar Hall (ZoomIT): A dedicated venue equipped for workshops, seminars, technical talks, and interactive sessions.
- Central Library Resources: Students have access to the college's central library, which houses a wide collection of books, journals, and reference materials supporting Information Technology and related disciplines.
- Cybersecurity Initiatives: The department actively promotes cybersecurity awareness and practical learning through student-led initiatives, workshops, and technical activities.
- Industry & Technical Engagement: Regular workshops, expert talks, hackathons, and technical events provide students with opportunities to enhance their practical knowledge and stay updated with emerging technologies.

Vision Of The College

To excel in higher learning in engineering and technology, nurturing and empowering young minds, fostering research and innovation, and reaching out to society, with a relentless pursuit of high academic standards and integrity.

Mission Of the College

- Impart Engineering knowledge and skills.
- Mould professionals with integrity.
- Nurture the spirit of innovation, creativity and sustainability to address needs of society.
- Collaborate with industry, academic and research institutions of repute.

Vision Of the Department

To excel in higher learning in engineering and technology by nurturing young minds, fostering innovation and research, and contributing meaningfully to society with a commitment to academic excellence and integrity.

Mission Of the Department

- To impart strong engineering knowledge and technical skills
- To develop professionals with integrity and ethical values
- To encourage innovation, creativity, and sustainability
- To collaborate with industry and research institutions for advancement

Programme Educational Objectives (PEOs)

- PEO 1

Achieve professional competency in the field of Information Technology to become successful IT solution providers and entrepreneurs.

- PEO 2

Acquire scientific and engineering knowledge to pursue higher education and research.

- PEO 3

Become professionals with effective interpersonal skills, leadership qualities and social concern.

Programme Specific Outcomes (PSOs)

- PSO 1: Design, implement and manage efficient and secure networking solutions with state-of-the- art Information and Communication Technologies.

- PSO 2: Design and develop solutions for real world problems using suitable programming languages and appropriate platforms by following the best software engineering principles and methodologies.

- PSO 3: Develop innovative solutions in the emerging areas of Information Technology.

Programme Outcomes (POs)

i.Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems

ii. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

iii. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations

iv. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions

v. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

vi. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

vii. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development

viii. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

ix. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings

x. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

xi. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments

xii. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

Faculty Section

The Department of Information Technology is supported by a team of dedicated and highly qualified faculty members who play a vital role in academic and research excellence. The faculty includes experienced professors, associate professors, and assistant professors with strong academic backgrounds.

Many members of the faculty are alumni of prestigious institutions such as IITs and NITs, bringing with them a wealth of knowledge and expertise. The department also includes Ph.D. holders who actively contribute to research, innovation, and academic development.

The faculty is committed not only to teaching but also to mentoring students, guiding projects, and encouraging participation in research activities, workshops, and technical competitions. Their continuous support helps students develop both technical competence and professional skills required in the IT industry.

FACULTY MEMBERS

Head of the Department:

Dr. Deepthi Sasidharan
– Associate Professor & Head of the Department

Dr. Deepthi Sasidharan leads the department with a strong focus on academic excellence, research development, and meaningful industry collaboration. Under her guidance, the department continues to strengthen its academic and research initiatives while fostering innovation, professional growth, and a culture of continuous learning.

Her leadership has played a key role in advancing the department as a center for quality education and emerging technologies in the field of Information Technology.

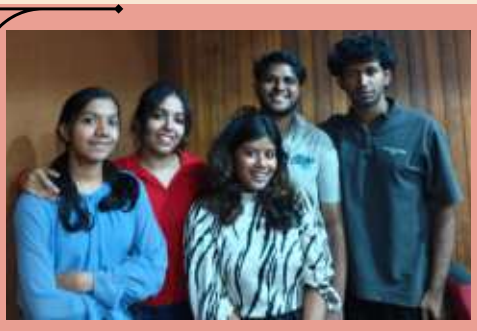
HACKATHONS & COMPETITIONS

2ND PRIZE – INDUSTRY 5.0 HACKATHON | STATE CIPHER – YASINA THASNEEM M, M S GAURI SANKAR, ASIN NAVED A, EVETTE CATELYN FERNANDEZ, MRINAL KRISHNAN J | ASIAN SCHOOL OF BUSINESS | 8 FEBRUARY 2026

1ST PRIZE – AGRITECH HACKATHON | COLLEGE CIPHER – YASINA THASNEEM M, M S GAURI SANKAR, ASIN NAVED A, EVETTE CATELYN FERNANDEZ, MRINAL KRISHNAN J | GEC BARTON HILL | 18 FEBRUARY 2026

2ND PRIZE – GOVTECH HACKATHON | COLLEGE BYTEFORCE – AATHMANA S NAIR, AFSANA AHMAD S, ARJUN V S, KRISHNAPRIYA R, NANDITHA S NAIR | GEC BARTON HILL | 18 FEBRUARY 2026



3RD PRIZE – CYBERTECH HACKATHON | COLLEGE BYTE404 – NIRUPAMA S, SOORAJ KUMAR S, LIZONA LOY PARAYIL, RYAN SEBASTIAN, DEVANANDA A | GEC BARTON HILL | 18 FEBRUARY 2026

2ND PRIZE – KAIZEN'26 | AGENTIC AI HACKATHON | ZONAL
AXIOM – ABHINAV B, ALEX ANTO CHERIAN, GREESHMA SUSAN LUKOSE, MILAN SHAJI | COLLEGE OF ENGINEERING MUTTATHARA | 21 FEBRUARY 2026

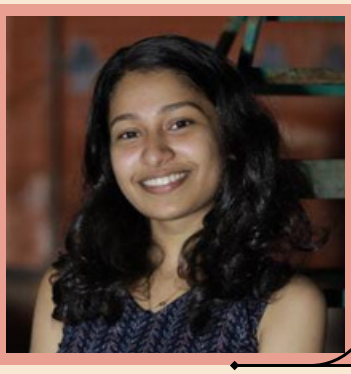
1ST PRIZE – GOVTECH HACKATHON | ZONAL
BYTEFORCE – AATHMANA S NAIR, AFSANA AHMAD S, ARJUN V S, KRISHNAPRIYA R, NANDITHA S NAIR | MARIAN ENGINEERING COLLEGE | 24 FEBRUARY 2026

1ST PRIZE – CYBERTECH HACKATHON | ZONAL
BYTE404 – NIRUPAMA S, SOORAJ KUMAR S, LIZONA LOY PARAYIL, RYAN SEBASTIAN, DEVANANDA A | SREE CHITRA THIRUNAL COLLEGE OF ENGINEERING | 26 FEBRUARY 2026

1ST PRIZE – AGRITECH HACKATHON | ZONAL
CIPHER – YASINA THASNEEM M, M S GAURI SANKAR, ASIN NAVED A, EVETTE CATELYN FERNANDEZ, MRINAL KRISHNAN J | ST. THOMAS COLLEGE OF ENGINEERING | 27 FEBRUARY 2026

1ST PRIZE – AGENTIC AI HACKATHON | ZONAL
AXIOM – ABHINAV B, ALEX ANTO CHERIAN, GREESHMA SUSAN LUKOSE, MILAN SHAJI | BASELIOS MATHEWS II COLLEGE OF ENGINEERING | 27 FEBRUARY 2026

1ST RUNNER-UP – PROTOTYPE 2.0 PROJECT EXPO | ZONAL
NIYA VALSAN A K | COLLEGE OF ENGINEERING PERUMON | 22 MARCH 2026



INVITED TO IEDC STARTUP SUMMIT 2026 | STATE
AMAL JYOTHI COLLEGE OF ENGINEERING, KANJIRAPALLY | 7 MARCH 2026
CIPHER – YASINA THASNEEM M, M S GAURI SANKAR, ASIN NAVED A, EVETTE CATELYN FERNANDEZ, MRINAL KRISHNAN J | BYTE404 – NIRUPAMA S, SOORAJ KUMAR S, LIZONA LOY PARAYIL, RYAN SEBASTIAN, DEVANANDA A | BYTEFORCE – AATHMANA S NAIR, AFSANA AHMAD S, ARJUN V S, KRISHNAPRIYA R, NANDITHA S NAIR
Three teams from the department were invited to the Kerala Startup Mission's IEDC Startup Summit 2026, where they were presented with awards for their achievements.

Appreciation from SCTIMST | INSTITUTIONAL

PROF. JASSIM RAFEEK, ARJUNAN M R, CHRISTIN JIJI | SREE CHITRA TIRUNAL INSTITUTE FOR MEDICAL SCIENCES AND TECHNOLOGY (SCTIMST) | 23 January 2025

Prof. Jassim Rafeek, Arjunan M R, and Christin Jiji received an appreciation from the Sree Chitra Tirunal Institute for Medical Sciences and Technology (SCTIMST) for developing a software system to manage animal inventory records in the institute's laboratory.

ARJUNAN M R

Featured Achievements

NATIONAL-LEVEL HACKATHON EXCELLENCE – A SERIES OF FIRST-PLACE FINISHES

Demonstrating exceptional consistency and technical excellence, Vimun A secured multiple first-place finishes across a series of national-level hackathons conducted by reputed engineering institutions during the 2025–26 academic year. Competing against participants from institutions across the country, these achievements highlight a remarkable ability to innovate, adapt, and deliver impactful solutions across diverse problem domains.

TRINITY MIRROR

NATIONAL DAILY FOR THE PEOPLE

Kerala engg student emerges champ at techno cultural fest

Coimbatore, April 19: Sri Ramakrishna Institute of Technology (SRIT), Pachapalayam, Coimbatore conducted its first national level Techno-Cultural Fest, VIHANSA 2K25, which came to a vibrant close with the valedictory event at the college auditorium. The two-day fest brought together a total of 500 students from across various colleges in Tamil Nadu and Kerala, with a total prize pool of Rs 4 lakh, VIHANSA 2K25 featured a wide range of competitions including coding contests, robotics, design challenges, cultural events, and talent hunts.

A major attraction of the fest was the 24-

and the engineering student VIMUN.A from Government Engineering College, Trivandrum, Kerala emerged as the winner, clinching the first prize of Rs 50,000 for his outstanding performance and creative solution. R Sundar, Managing Trustee, Trust distributed the cash prizes and congratulated the winners.

The valedictory ceremony was graced by chief guest Puviarasu, actor and SRIT Alumnus (2006–2010 batch), and guest of honour C.J. Rishab, Social Media Influencer, Managing Director of CJ Alumnus (2018–2022 batch). Their presence added inspiration and joy to the event, as they shared valuable insights with the student community. VIHANSA 2K25 proved to be a perfect blend of technology, creativity, and collaboration—leaving an indelible mark on all who

The first of these accomplishments was achieved at Sri Ramakrishna Institute of Technology, where a Gesture-Controlled Home Automation system was developed, offering an intuitive and efficient approach to smart home interaction. This was followed by another first-place finish at Mailam Engineering College for anAI-Based Physiotherapy Tool, showcasing the practical application of artificial intelligence in healthcare.

Continuing this streak, a General Hackathon at MSAJCE saw the development of an AI-Based Neuro Rehabilitation Device, addressing critical needs in medical recovery through advanced technological intervention. The final win in this series came at St. Joseph College of Engineering, where an AI-Based Gesture Recognition system was presented, noted for its high accuracy and real-time performance.

What makes this achievement particularly noteworthy is the consistency maintained across multiple competitions, each demanding unique problem-solving approaches and domain-specific innovation. These accomplishments reflect not only individual technical capability but also the ability to independently conceptualize, develop, and execute solutions at a national- level, bringing significant recognition to the department.

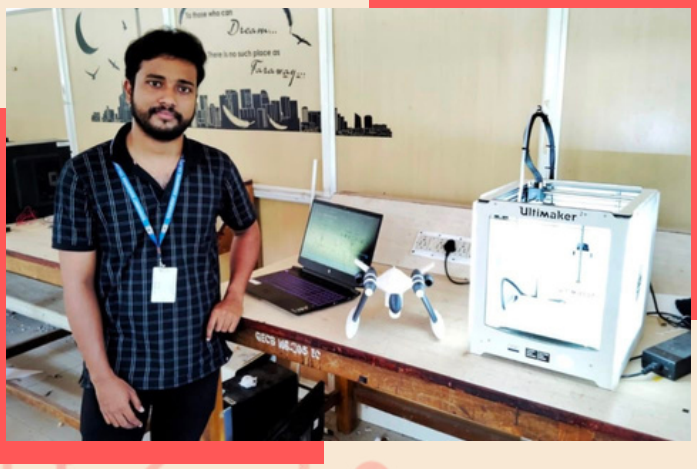
NATIONAL REPRESENTATION IN SHOOTING – ADRIKA NARAYANAN

Adrika Narayanan, an S4 Information Technology student, has achieved remarkable success in shooting by representing both the state and university at prestigious national-level competitions. She was selected as a member of the Kerala State Shooting Team for the National Games 2025 held in Uttarakhand, marking a significant milestone in her sporting journey.

Continuing her success, she was also selected to represent APJ Abdul Kalam Technological University (KTU) at the All India Inter University Shooting Championship held in Meerut in January 2026.

Her participation at these national-level events reflects her consistent performance, dedication, and commitment to the sport alongside her academic pursuits in Information Technology. This accomplishment highlights both her individual excellence and the department's growing presence on the national stage.

Zelbytes Private Limited : Engineering the Future of Precision Agriculture



Founded with the vision of applying advanced technologies to solve real-world agricultural challenges, Zelbytes Private Limited has rapidly emerged as one of Kerala's promising agritech startups. By combining Artificial Intelligence (AI), the Internet of Things (IoT), edge computing, and autonomous systems, the company is working to transform conventional farming into a smarter, data-driven ecosystem. Its solutions focus on precision agriculture, enabling farmers and institutions to improve productivity, optimize resource use, and make informed decisions through intelligent technologies.

During 2025–26, Zelbytes achieved a major milestone by signing a Memorandum of Agreement with the K-AgTech Launchpad, a collaborative initiative backed by Kerala Agricultural University (KAU), NABARD, and Western Sydney University (WSU). Through this partnership, the company assumed a dual role by joining the incubation programme while also serving as the Technical Infrastructure Partner for the Launchpad.

As the Technical Infrastructure Partner, Zelbytes will architect and deploy the technological backbone of the Vellayani campus. This includes enterprise-grade edge AI vision systems, intelligent IoT sensor networks, and plug-and-play autonomous frameworks designed to create a world-class precision agriculture ecosystem. These technologies will support continuous crop monitoring, automate data collection, and enable smarter farming practices.

As part of the incubation programme, the company will further refine its Farming-as-a-Service (FaaS) model and enhance its machine learning algorithms in a real agricultural environment. The collaboration is expected to accelerate research, product validation, and commercial deployment while strengthening links between academia, industry, and innovation.

Over the coming months, Zelbytes plans to deploy autonomous farming systems, edge AI cameras, and smart IoT networks across the Vellayani campus, creating a state-of-the-art precision farming facility that demonstrates the practical impact of AI-powered agriculture.

Despite beginning with limited resources, Zelbytes has continued to grow through innovation, perseverance, and strategic collaborations. From developing intelligent agricultural platforms to partnering with leading institutions such as KAU, NABARD, and Western Sydney University, the company has demonstrated how startup-driven innovation can contribute meaningfully to the future of farming. Its journey during 2025–26 reflects the growing role of deep technology in building a more efficient, sustainable, and resilient agricultural ecosystem.

Cardiac Arrhythmia Simulator Developed at SCTIMST

As part of an academic project at the Sree Chitra Tirunal Institute for Medical Sciences and Technology (SCTIMST), Thiruvananthapuram, a team of Information Technology students—Preethi Krishna, Syeda Fathima, Bharath Vighnesh, Bhairavi H, and Archa A. S.—developed a Cardiac Arrhythmia Simulator to generate and analyze abnormal electrocardiogram (ECG) waveforms, enabling the study of different cardiac arrhythmias and their clinical significance.

Preethi Krishna

Bharath Vighnesh

Archa AS

Syeda Fathima

Bhairavi H

The simulator provides realistic representations of various arrhythmia conditions, making it a valuable tool for medical education, research, and software testing. Working in SCTIMST's multidisciplinary research environment, the team gained hands-on experience in ECG signal analysis, software development, and healthcare computing. Guided by Ms. Surya Priya S and Dr. Haripriya, the project reflects the department's commitment to innovation and interdisciplinary collaboration in healthcare technology.

YIP 6.0 DISTRICT LEVEL WINNING PROJECT - SMART BUS STOP TICKET GENERATING MACHINE

The Young Innovators Program (YIP) 6.0, organized by the Kerala Development and Innovation Strategic Council (K-DISC), encourages students to develop innovative solutions to real-world challenges. A team of third-year Information Technology students — Aparna, Ardra, Jyothika, Hadiya, and Meenakshi — actively participated in this initiative and developed a practical and impactful technological solution.

Their project, titled "Smart Bus Stop Ticket Generating Machine," addresses common difficulties faced by passengers while purchasing bus tickets, especially during peak hours. The proposed system consists of an automated ticket-generating machine installed at bus stops, allowing passengers to select their destination and make payments using digital methods such as UPI or card. Upon successful payment, a printed ticket is generated, enabling passengers to board buses without delay.

The system reduces congestion inside buses, improves efficiency for both passengers and conductors, and promotes digital transactions. The team undertook extensive research, discussions, and collaborative planning to develop and present the concept effectively. Their efforts were recognized with a District-Level win in YIP 6.0, marking a proud achievement and reinforcing their ability to design solutions with real-world impact.

Innovating Beyond Boundaries: GECBH Team Shines at Cognizant Technoverse 2026

The Department of Information Technology proudly congratulates the GECBH team on securing a place among the finalists at Technoverse 2026, the prestigious national-level hackathon organized by Cognizant. We are especially proud of our students Afila Fathima S, Apsara M. V., Blessy Mariya Benny, and Christin Jiji, who were part of this remarkable achievement and represented the department with distinction.

Competing against talented participants from institutions across the country, the team demonstrated exceptional technical expertise, creativity, and teamwork. Their journey to the finals reflected months of dedication, innovative thinking, and the ability to develop impactful solutions in a highly competitive national-level hackathon. Reaching the finals of such a prestigious competition is a significant accomplishment that highlights the students' commitment to excellence and reinforces GECBH's growing presence in technology and innovation. Their achievement serves as an inspiration to aspiring innovators and showcases the talent, determination, and collaborative spirit fostered within the GECBH community.

NATIONAL RECOGNITION AT ALLIANZ TECH CHAMPIONSHIP 2025

Among 389 submissions from across the country and over 200 participants representing leading engineering institutions, Ziya Moosir T and Bharath Vighnesh, third-year Information Technology students of Government Engineering College Barton Hill, emerged among the winners of the prestigious Allianz Tech Championship 2025, organized by Allianz.

The duo earned national recognition for Zyra, an AI-powered women's safety solution that promotes safer mobility through intelligent route assistance. The system evaluates and scores travel routes in real time by analyzing factors including lighting conditions, crowd density, traffic movement, crime history, time of day, proximity to police stations, CCTV availability, and user-generated safety inputs, helping users make informed travel decisions.

Beyond route analysis, Zyra incorporates emergency features such as SOS activation, live location sharing, and automatic redirection to the nearest safe location, providing immediate assistance during emergencies.

The Allianz Tech Championship featured a rigorous multi-stage selection process comprising structured submissions, technical evaluations, and final presentations before expert panels.

NATIONAL RECOGNITION AT ALLIANZ TECH CHAMPIONSHIP 2025

From Government Engineering College Barton Hill, 12 students participated, with Ziya Moosir T and Bharath Vignesh securing places among nearly 50 winners nationwide.

In recognition of their innovation and impactful solution, both students were awarded a scholarship of €3,000 each, acknowledging the technical excellence and real-world potential of their project. The final recognition ceremony was held at the Allianz Niagara Convention Centre, marking a significant milestone for the students and a proud achievement for Government Engineering College Barton Hill in innovation and applied problem-solving.

SELECTION TO KTU CRICKET TEAM
A REMARKABLE SPORTING MILESTONE

Deepak Jaimohan, a second-year Information Technology student, achieved a significant milestone by being selected to the APJ Abdul Kalam Technological University (KTU) cricket team. His selection marks the department's return to university-level cricket representation after several years.

His journey began with the A Zone matches in Thiruvananthapuram, where the college team defeated Lourdes Matha College of Science and Technology, Musaliar College of Engineering and Technology, Sree Chitra Thirunal College of Engineering, and progressed to the finals against the College of Engineering Trivandrum.

The team then advanced to the Inter Zone stage in Angamaly, competing against the College of Engineering Karunagappally and Government Engineering College Thrissur. At the All India South Zone Inter-University tournament in Mysore, the KTU team faced Thiruvalluvar University, Mahatma Gandhi University Nalgonda, and REVA University.

Deepak's selection reflects his dedication, discipline, and consistent performance. His achievement highlights the successful balance of academics and sports while inspiring fellow students.

GECBH Cricket Team Shines as A-Zone Runners-Up: A Proud Moment for the IT Department

The Department of Information Technology proudly congratulates the GECBH Cricket Team, including our students Sooraj S, Pavan Tharapel Anil, Abhishek V. S., Deepak Jaimohan, and M. Sanjay Krishna, on emerging as the A-Zone Runners-Up for the 2025–26 season and qualifying for the KTU Interzone Tournament held at FISAT, Angamaly.

The team's impressive A-Zone campaign reflected resilience, discipline, and exceptional teamwork. Facing strong competition, the players displayed outstanding sportsmanship and determination, making every match a testament to their hard work and passion for the game. Their runners-up finish was a proud achievement for both the team and the GECBH community.

Their dedication and consistent performances have inspired fellow students and strengthened GECBH's presence in collegiate sports. Every run scored, wicket taken, and effort on the field contributed to a memorable campaign that showcased the true spirit of teamwork and perseverance.

The Department of Information Technology extends its heartfelt congratulations to the entire GECBH Cricket Team for this well-deserved accomplishment and takes immense pride in the contributions of its students to this success. We wish the team continued success in all their future sporting endeavors and look forward to witnessing many more milestones in the years ahead.

SARGAM 2026 – DEPARTMENTAL EXCELLENCE IN ARTS AND CULTURE

Sargam, the annual cultural festival of the college, is a vibrant celebration of talent across disciplines including literature, arts, theatre, dance, music, and various creative domains. The festival provides a platform for students to showcase their abilities, with overall performance determining the Best Department title.

At Sargam 2026, conducted on April 6 and 7, the Information Technology department emerged as the Best Department, reflecting a collective display of talent, dedication, and consistent performance across multiple categories.

Further adding to this achievement, two of the festival's most prestigious individual titles were secured by students of the department. The title of Kalaprathibha (best male performer) was awarded to M.S. Gaurisankar (S4 IT), while the title of Kalathilakam (best female performer) was jointly won by Goury Vibin (S4 IT) and Sreya S.S (S6 IT).

These recognitions highlight not only individual excellence but also the department's strong cultural presence, making Sargam 2026 a significant milestone in its journey of holistic development.

A Remarkable Achievement:
Sanjay Selected for Allianz Aspire 2026 Internship Program

Our department proudly congratulates Mr. Sanjayram Prasad, a first-year M.Tech student, on his remarkable achievement of being selected for the prestigious Allianz Aspire 2026 Internship Program.

The Allianz Aspire Internship Program is a highly competitive opportunity that recognizes talented students with strong technical aptitude, problem-solving skills, and the potential to excel in a professional environment. Earning a place in this program is a testament to Sanjay's dedication, perseverance, and commitment to academic and personal growth.

This accomplishment not only marks an important milestone in his career but also serves as an inspiration to fellow students to pursue excellence and embrace opportunities that contribute to their professional development. Achievements like these reflect the quality, talent, and determination fostered within our department.

PTA Honours Navendu Gopan for KTU Interzone Karate Championship Achievement

The Government Engineering College Barton Hill (GECBH) Parent-Teacher Association (PTA) proudly honoured Navendu Gopan in recognition of his outstanding achievement of winning the Bronze Medal at the KTU Interzone Karate Championship 2024–25.

The award was presented as a token of appreciation for Navendu's dedication, perseverance, and exceptional performance in representing the college at the prestigious interzone championship. His achievement reflects the values of discipline, determination, and excellence that GECBH strives to instill in its students.

The PTA's recognition celebrates not only Navendu's sporting success but also the hard work and commitment that led to this remarkable accomplishment. .

Such achievements inspire fellow students to pursue excellence in both academics and extracurricular activities while bringing pride to the institution

Scholarship Awarded by Syanandurapuri Charitable Organization

Ardra N J, a student of the Department of Information Technology, was awarded a scholarship by the Syanandurapuri Charitable Organization, Thycaud, Thiruvananthapuram, in recognition of her academic excellence.

The scholarship is instituted by a group of retired professionals who identify and encourage deserving students through academic support initiatives. This recognition reflects Ardra's consistent academic performance and stands as an inspiration to fellow students to strive for excellence in their educational pursuits.

GECBH Badminton Team Clinches KTU A-Zone Championship

The Department of Information Technology proudly congratulates the GECBH Badminton Team on emerging as Champions at the KTU A-Zone Badminton Tournament 2025–26. Among the players who contributed to this remarkable achievement are our students Vignesh V and Avinash Vinod APK, whose dedication and performances played a vital role in the team's success.

Facing strong competition throughout the tournament, the team displayed exceptional skill, determination, and teamwork to secure the coveted A-Zone Championship. Their victory reflects the hard work, disciplined preparation, and sporting excellence fostered at GECBH, while also inspiring fellow students to strive for success both on and off the court.

The Department of Information Technology takes immense pride in the accomplishments of Vignesh V and Avinash Vinod APK, whose contributions have brought glory to both the department and the institution. We extend our heartfelt congratulations to the entire badminton team and wish them continued success in their future sporting endeavours.

Academic & Professional Achievements

Competitive Exams

Students of the department have consistently excelled in national-level competitive examinations, reflecting their strong academic foundation, analytical skills, and dedication. These achievements reinforce the department's commitment to academic excellence and higher learning.

Department Activities

IFTAR GATHERING – DEPARTMENT INITIATIVE

The second-year students of the Department of Information Technology organized an Iftar gathering as part of fostering inclusivity and cultural harmony within the department. The event brought together students and faculty members in a spirit of unity, allowing everyone to experience and appreciate the significance of the occasion.

The gathering provided a platform for interaction beyond academics, strengthening bonds among peers and promoting a sense of belonging within the department. The initiative reflected the students' commitment to creating an inclusive and respectful campus environment.

ONAM SADHYA– DEPARTMENT CELEBRATION

The second-year students of the Department of Information Technology hosted a grand Onam Sadhya for the entire department, celebrating the spirit of Kerala's most cherished festival. The event witnessed enthusiastic participation from students and faculty, bringing the department together in a vibrant and festive atmosphere.

The traditional feast was organized with great coordination and teamwork, showcasing the students' ability to manage large-scale events effectively. Beyond the celebration, the initiative strengthened unity, cultural appreciation, and collective spirit within the department.

CYBERSECURITY WORKSHOP – ENCRYPTO

The Department of Information Technology, Govt. Engineering College, Barton Hill, organized a cybersecurity workshop titled "Encrypto: From Script to Ransom – Watch Data Leak and Files Locked in Real Time" on 10 February 2026 at Zoom IT. Conducted from 1:00 PM to 3:00 PM, the workshop aimed to provide participants with practical insights into modern cyber threats and the evolving landscape of cybersecurity.

Led by Alan V Jiju, with Sreerag and Praveen as co-speakers from Offenso Hackers Academy, the session offered a hands-on learning experience through live demonstrations of real-world attack scenarios. Participants observed how data breaches can occur and how ransomware attacks can compromise systems by locking files in real time. By illustrating the techniques used by attackers and discussing preventive measures, the workshop helped students develop a deeper understanding of cybersecurity challenges and the importance of safeguarding digital assets.

The session also marked the beginning of a continued collaboration with Offenso Hackers Academy. As part of this initiative, opportunities were proposed for a limited number of students to attend free offline cybersecurity workshops at the academy, along with future sessions exploring topics such as the design and development of Capture The Flag (CTF) challenges. These initiatives are expected to provide students with greater exposure to practical aspects of cybersecurity and ethical hacking.

INAUGRATION OF CYBERSECURITY CLUB – AEGIS

The Department of Information Technology took the initiative to establish a cybersecurity club for the college titled AEGIS, aimed at fostering awareness, technical expertise, and interest in the field of cybersecurity among students.

The club was formed under the guidance of faculty members, with Professor Haripriya S, the then Head of the Department, serving as the faculty head. The initiative reflects the department's commitment to strengthening cybersecurity knowledge and creating a platform for students to explore ethical hacking, digital security, and real-world cyber defense practices.

AEGIS is envisioned as a hub for workshops, hands-on sessions, and collaborative learning, encouraging students to stay ahead in the rapidly evolving domain of cybersecurity.

Leading Beyond the Classroom

Leading Innovation through IEEE

Professional societies play a vital role in shaping students beyond the classroom, providing opportunities to lead, innovate, collaborate, and engage with the wider technical community. During the 2025–2026 tenure, students from the Department of Information Technology made a strong impact across the IEEE Student Branch and its affinity groups, contributing through leadership, technical initiatives, creative media, and community-driven projects

Akshay E. Muthu served as Vice Chairperson of the IEEE Computer Society Student Branch Chapter, while Navendu Gopan managed the branch's digital presence as Webmaster. Pourna Alex contributed as Secretary of the IEEE SIGHT Affinity Group, supporting initiatives that leveraged technology for social good.

The department's creative presence was equally significant, with Elizabeth Mavely contributing to the IEEE CS Content Team and Vishnupriya B. Rajesh serving as the Video Editor of the IEEE Student Branch. At the JuniorCom level, Goury Vibin and Nandana Predeep represented the department in IEEE CS, while Adhith A. K. and Alex Anto Cherian contributed through IEEE SIGHT.

Together, these students strengthened the department's presence within IEEE, demonstrating leadership, technical expertise, creativity, and a commitment to professional growth.

Building Communities through CSI

The Department of Information Technology continued to play a central role in the activities of the Computer Society of India (CSI) during the 2025–2026 tenure. Through the CSI Student Branch, CSI Beta, the Coding Club, and various creative and technical teams, students contributed to organising events, mentoring peers, promoting technical learning, and strengthening the department's student community

The CSI Student Branch was led by Aiswarya Ajikumar (Chairperson) and Govind J (Vice Chairperson), with Nirupama S coordinating events and Evette Catelyn Fernandez leading publicity efforts.

CSI Beta was headed by Gopika Biju S, supported by Archa U B, Swathy Pradeep, Alex Anto Cherian, Bhairavi H, and Devananda A, who collectively organised collaborative and skill-development initiatives.

The department's Coding Club was led by Airine Johns, Riya Mariyam Reji, Apsara M V, and BhagyaLekshmi D, encouraging programming, technical learning, and peer mentorship.

Students also contributed across CSI's Design, Content, Membership, Web Development, and General Teams. Sreya S S, Blessy Mariya Benny, Lizona Loy Parayil, Gauri Smiju, Hadiya Salma R, Mrinal Krishnan J, Krishna S S, Meenakshi S M, Christin Jiji, and Yasina Thasneem M played key roles in supporting the society's creative, organisational, and technical initiatives.

Driving Entrepreneurship with IEDC

Innovation and entrepreneurship remained key strengths of the department during the 2025–2026 tenure, with Information Technology students playing prominent roles in the Innovation and Entrepreneurship Development Centre (IEDC).

At the senior Board of Governance, Adarsh S. Suresh served as Chief Executive Officer (CEO), Shiyas S. as Chief Technology Officer (CTO), and Airine Johns as Chief Creative Operations Officer (CCoO), leading initiatives that promoted innovation, technology, and student entrepreneurship.

The department was also represented across the Junior Board of Governance and operational teams. Keerthana Suresh served as Women Entrepreneurship Lead, while Lizona Loy Parayil, Gauri Smiju, Arya S., Joakim Manoj, Yasina Thasneem M., and Aishwarya Sreyas contributed through the Operations, Technical, Marketing, and Content Teams.

Their leadership and continued involvement strengthened the department's presence within IEDC and encouraged greater participation in innovation, startups, and entrepreneurial activities.

Engineering Leadership through ISTE

Students from the Department of Information Technology actively contributed to the ISTE Student Chapter during the 2025–2026 tenure by taking up leadership, technical, and organisational responsibilities across the chapter and its Bartonair Wing.

The chapter was led by Gouri H N (Chairperson) and Shiyas S. (General Secretary), while Nithin A. served as Senior Webmaster and Secretary of Bartonair, overseeing both chapter operations and its digital presence. Leadership roles were also held by Krishnapriya R, Jayalekshmi J, Keerthana Suresh, Arjunan M R, Joakim Manoj, Gopika G S, Trinita T D, Gauri Smiju, Arya S., and Abhay Menon, who contributed across finance, publicity, public relations, web development, departmental representation, and content creation.

Their collective efforts helped strengthen chapter activities while encouraging wider student participation in technical learning, leadership, and professional development.

Student Contributions

Human Cruelty To Nature

Anagha VK
S2 IT

We cut the trees that gave us breath,
We poison rivers, slow to death.
The sky, once blue, now filled with smoke,
Nature cries, but we don't notice the choke.
We cage the birds, we burn the land,
All for power, all man-planned.
The earth still gives, asks just for care,
Yet greed makes us unaware.
If we choose love instead of greed,
Heal the wounds our actions breed,
Nature will smile, fresh and new
But the change must start with me and you

" Are we living or just scrolling ? "

Siva soorya V
S2 IT

In a world where everything is just a tap away, we often forget what it means to truly live. Our days begin with notifications and end with endless scrolling. Somewhere between reels, memes, and messages, real moments quietly slip away.

We are more connected than ever before, yet strangely disconnected—from nature, from people, and sometimes even from ourselves. Conversations have become shorter, attention spans weaker, and silence uncomfortable. The question we need to ask ourselves is simple:

ARE WE IN CONTROL OF TECHNOLOGY, OR IS IT CONTROLLING US?

College life, often described as the best phase of one's life, is now increasingly lived through screens Friends sit together but speak less, choosing instead to interact through their phones. Memories are captured, filtered, and posted-but rarely felt in their raw form.

This isn't to say technology is bad. It has transformed learning, connected distant hearts, and opened doors to endless opportunities. But like everything powerful, it demands balance. Without it, we risk losing the essence of human experience—genuine laughter, deep conversations, and the beauty of being present .

The solution is not to abandon technology, but to reclaim control: to step outside without our phones once in a while, to talk without distractions, and to live moments that don't need validation from likes or comments.

Because at the end of the day, life isn't measured by the number of views we get, but by the

MOMENTS WE TRULY EXPERIENCE

So maybe, just maybe, it's time to pause... look up... and start living again.

Thenmala: An Escape where Nature, Adventure, and Silence Meet Me

Naveen SV
S2 IT

There are some trips that give us photos, and there are others that give us peace. My journey to Thenmala, India's first planned eco-tourism destination, belongs to the second category. Nestled in the green heart of Kollam district, Kerala, Thenmala offered me a rare experience-one were nature, adventure, and self-reflection came together beautifully.

The trip began early in the morning. As we moved away from the city, the usual noise, traffic, and rush slowly disappeared. Concrete buildings turned into stretches of greenary, rubber plantations, and thick forests. The air felt cooler, fresher, and lighter with every kilometer we travelled. Even before reaching Thenmala, the journey itself felt therapeutic.

When we reached Thenmala, the first thing I noticed was it's peaceful silence and well-maintained, eco-friendly surroundings. Unlike crowded tourist spots it felt calm, organised, and perfectly balanced with nature. Our first stop was the Thenmala dam, where the vast stretch of water, surrounded by lush green hills, created a soothing view. The gentle breeze and stillness of the place made it a quiet and unforgettable moment.

From there, the trip slowly shifted from calm to excitement as we entered the Adventure Zone.The hanging bridge was my first challenge. Walking across it while feeling the slight movement under my feet was both thrilling and scary. Halfway through, I stopped and looked around—the forest stretched endlessly, and the view made the fear worth it. It felt like standing inside a nature documentary.

The forest trail walk was another unforgettable experience. Every step revealed something new e forest trail walk was another unforgettable experience. Every step revealed something new —twisted tree roots, small streams, birds flying across, and the sound of leaves crunching beneath our feet. It felt raw and real, reminding me how disconnected we usually are from nature.

Activities like rock climbing and river crossing tested both physical strength and confidence, adding an adventurous spark to the trip.One of the most peaceful sections was the Butterfly Safari. Watching butterflies of different colours flutter freely around us felt almost magical. There were no cages, no barriers—just life moving naturally. It made me realise how fragile yet beautiful ecosystems are and how important it is to protect them.One of the most peaceful sections was the Butterfly Safari. Watching butterflies of different colours flutter freely around us felt almost magical. There were no cages, no barriers—just life moving naturally. It made me realise how fragile yet beautiful ecosystems are and how important it is to protect them.

As evening approached, the atmosphere changed again. The musical dancing fountain became the highlight of the night. The combination of lights, water movements, and music brought energy and joy, perfectly balancing the calm and adventurous parts of the day. It was a lively ending to a day filled with diverse emotions.

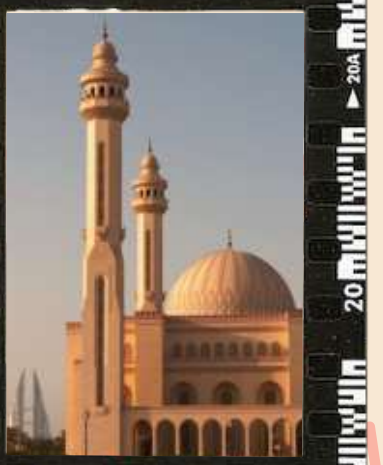
Food stalls nearby served simple snacks, but sitting there, sharing food and laughter after a long day of exploration, made everything taste better. The tiredness in my legs felt satisfying—it was the kind of tiredness that comes after doing something meaningful.

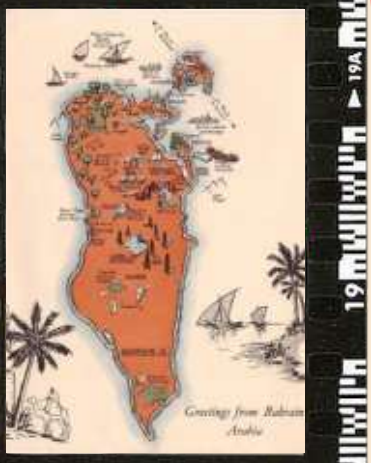
What impressed me the most about Thenmala was how it taught lessons without trying to. It showed how tourism can exist without destroying nature, how adventure doesn't always require danger, and how peace doesn't always require isolation.When we finally left Thenmala, I carried back more than memories and photos. I carried back a calm mind, a refreshed heart, and a deeper respect for nature. In a world that constantly feels loud and rushed, Thenmala felt like a gentle reminder to slow down and breathe.

In conclusion, Thenmala is not just a tourist destination—it is an experience that blends nature,adventure, sustainability, and inner peace. For students, nature lovers, and anyone seeking a break from routine life, Thenmala is a place that leaves a lasting impression. It is a journey I will always remember and one I would gladly take again.

A December to remember

Anamika KP
S2 IT





December 2024 became a truly unforgettable month in my life as I got the opportunity to visit Bahrain and celebrate New Year there for the first time ever. It was not just a trip to another country—it was a journey filled with new experiences, cultures, and memories that I will always treasure.

From the moment I landed in Bahrain, everything felt exciting and different. The country welcomed us with pleasant winter weather, clean roads, tall buildings, and a calm yet lively atmosphere. Compared to the busy routines back home, Bahrain felt peaceful and well-organized, giving me a refreshing break from academic life.

During the days, I explored many beautiful places. Visiting the Bahrain National Museum helped me understand the country's rich history and traditions. Walking along the Corniche and spending time at popular shopping malls were equally enjoyable. I was fascinated by how modern life blends smoothly with traditional Arab culture. The food was another highlight of the trip—tasting new dishes and flavors made every meal special.

The most memorable part of the journey was welcoming the New Year in a completely new environment. As December 31st arrived, the atmosphere became festive with lights, decorations, and cheerful crowds. At midnight, watching fireworks light up the sky was magical. Standing there, far from home, I felt grateful, hopeful, and excited for the year ahead. It was my first time celebrating the New Year abroad, and the experience made me realize how beautiful it is to welcome new beginnings in a new place.

This journey also taught me valuable lessons. Traveling helped me become more confident, independent, and open-minded. Meeting people from different backgrounds showed me how diverse yet connected the world is. It reminded me that learning does not happen only in classrooms—sometimes, it happens through travel and real-life experiences.

As I returned home, I carried back more than souvenirs. I brought memories, inspiration, and a fresh perspective on life. My December 2024 visit to Bahrain and my first-ever New Year celebration abroad will always remain a special chapter in my student life.

I am truly grateful for this beautiful experience.

Shackles Of Exclusion

Preethi SP
S2 IT

Born beneath a quieter sky,
Where dreams were taught not to fly,
She learned to shrink, to stay confined,
A caged soul with a restless mind.

They drew her world in fragile lines,
Of do not cross and silent signs,
A life designed by chosen hands,
I wore the chains they couldn't see.

In crowded rooms, I stood alone,
A silent heart, a voice unknown.
Laughter echoed, yet not for me
I wore the chains they couldn't see.

Eyes that passed, but never stayed,
Words unspoken, bonds delayed,
A world so close, yet far away,
Where I was lost in shades of gray.

Why must her wings be trimmed so small,
While others rise and stand so tall?
Why is her freedom locked away,
In shadows that refuse the day?

Finding Myself Between Pages and People

Krishnapriya M
S2 IT

Who is She?

A caged soul with a restless mind.
College is not just about classrooms, assignments, or exams—
it is a journey of discovering who I truly am.
Every day, between rushing to lectures and sharing laughter with friends, I find small moments that shape me into a better version of myself.

There are days filled with confidence, where everything feels possible, and there are days of doubt, where even simple tasks seem overwhelming.
But I have come to realize that both are equally important.
Success teaches me to believe in my abilities,
while challenges teach me patience and resilience.

What makes this journey special are the people I meet along the way—friends who turn
ordinary days into unforgettable memories. These experiences quietly build my identity,
helping me grow not just academically, but emotionally as well.

As I continue this journey, I may not have everything figured out, but I am learning, evolving,
and moving forward. And perhaps, that is what college truly means—not just finding
answers, but finding myself.

Rebirth
Of A Woman

Arya S
S4 IT

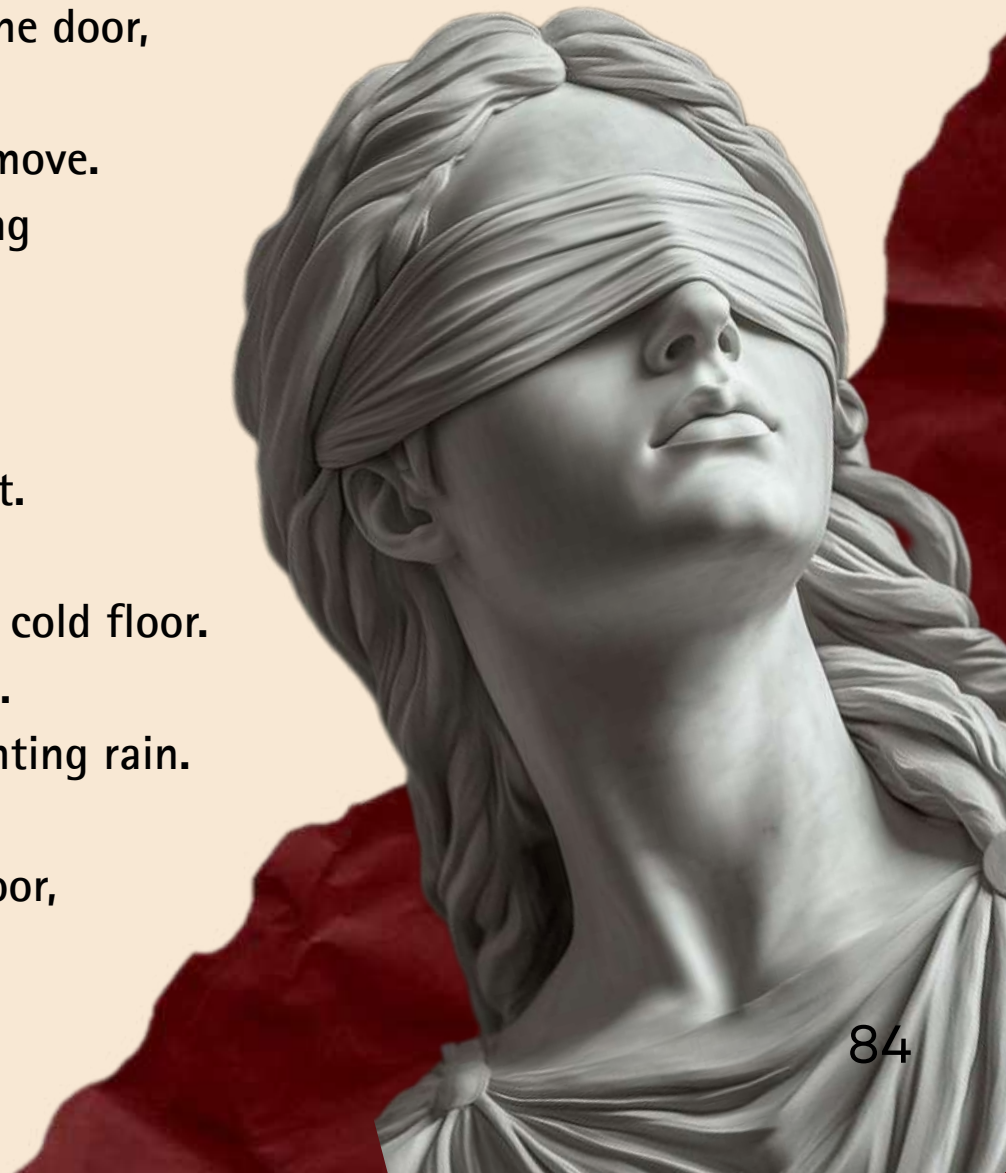
Outside, the rain wept endlessly silver threads unraveling the night.
Loneliness clung to every corner, heavy as mist.
She sat curled beneath a blanket, yet no warmth could calm the storm within her.
Fear whispered through her veins, quiet but unveiling.

Then that sound.

Her eyes darted toward the door,
searching for the unseen.
But her body refused to move.
In the dark, only one thing
breathed light a firefly.
It hovered gently,
its tiny glow
trembling like a heartbeat.
She dared
not place her feet on the cold floor.
No thunder. No lightning.
Only rain endless, unrelenting rain.

Who could it be at my door,
on such a night?

Again, the same sound.



It must be past ten.
Her heart pounded so loudly, it drowned the rain itself.
Suddenly, a sharp beam of light pierced through the window uninvited, intrusive.
Her lips quivered, but no words came.
Fear had locked her voice away.
How long could she live like this trapped between silence and shadow?
If she stood up, what then?
If she cried out, what then?
If she stayed silent forever would the darkness consume her whole?
Thoughts poured down like rain.
Time slipped quietly away.
The sound at the door faded, and at last, exhaustion pulled her into uneasy sleep.
Outside, the storm softened; inside, her dreams swirled with echoes of fear.
But then like thunder cracking open the sky that sound returned.
Her eyes flew open. The firefly still danced in the dark.
Who could it be? What could it be? Why must it be?
Terror gripped her heart until it almost stopped.
A scream tore from within raw, defiant the cry of a woman who had been silent too long.
And in that single breath, something inside her changed.
Fear broke like glass.
From its shards rose a new strength fierce, bright, alive.
She stood.
She walked to the door, her steps steady and sure.
"Who is it?" she called, her voice ringing through the storm.
"What do you want?"
A pause.
Then footsteps. Fleeing into the rain.
And in that moment, she felt it the chains of fear falling away.
For the first time, the silence did not scare her.
It embraced her.
A smile blossomed upon her lips tender, victorious.
Outside, the rain still fell, but inside her, a woman was reborn.

Racing Beyond Limits

Aleen Sheethal Biju
S2 IT

I had the proud opportunity to represent my school at a district-level sports competition, where I participated in the 100-meter and 200-meter races. The atmosphere of the event was filled with excitement, expectations, and intense competition, which naturally brought moments of tension and stress. Athletes from various schools had gathered, each determined to give their best performance, making the competition both challenging and motivating.

Despite the pressure, I remained focused and gave my best in the 100-meter race, which helped me secure first-place. This achievement boosted my confidence, but the real test came during the 200-meter race. At the start, I faced an unexpected difficulty as I could not hear the siren clearly, which caused momentary confusion and anxiety. For a brief moment, it felt overwhelming, but I quickly gathered my composure, trusted my training, and concentrated on the race ahead.

Overcoming my fear and stress, I ran with determination and complete focus, pushing myself until the finish line. My efforts were rewarded when I achieved first place in the 200-meter race as well. Winning two first positions at the district level was an unforgettable experience and a proud moment for me and my school. This competition taught me valuable lessons about perseverance, mental strength, and self-belief, proving that challenges can be overcome with confidence and determination.

Ooty – The Queen Of Hills

Ayisha A
S2 IT

Traveling helps us relax and explore new places. During my recent vacation, I visited Ooty, one of the most beautiful hill stations in India. The trip was refreshing and full of pleasant memories. Ooty welcomed us with cool weather, green hills, and fresh air. The first place we visited was Ooty Lake. The calm water and surrounding trees made the place very peaceful. We enjoyed walking around the lake and spending time with family while enjoying the lovely scenery. We also went boating in the lake, and it was such a unique experience. The lake was glowing because of the sunlight. Next, we went to the Shooting Point. This place was surrounded by wide green fields and misty hills. It looked exactly like the scenes we see in movies.

The weather was cool, and the view was breathtaking. It was the perfect spot to take photographs and enjoy nature. We spent a lot of time there, enjoying quality time with my family. We took many pictures to save these memories. Shooting Point was my favourite place during the entire trip. Another beautiful place we visited was the Botanical Garden. The garden had many colorful flowers, tall trees, and well-maintained lawns. Walking through the garden was relaxing and joyful. It also helped us learn about different types of plants. Overall, my trip to Ooty was wonderful and refreshing. It gave me a break from my daily routine and allowed me to connect with nature. This trip will always remain special in my heart.

Silent Shackles

Evette Catelyn Fernandes
S4 IT

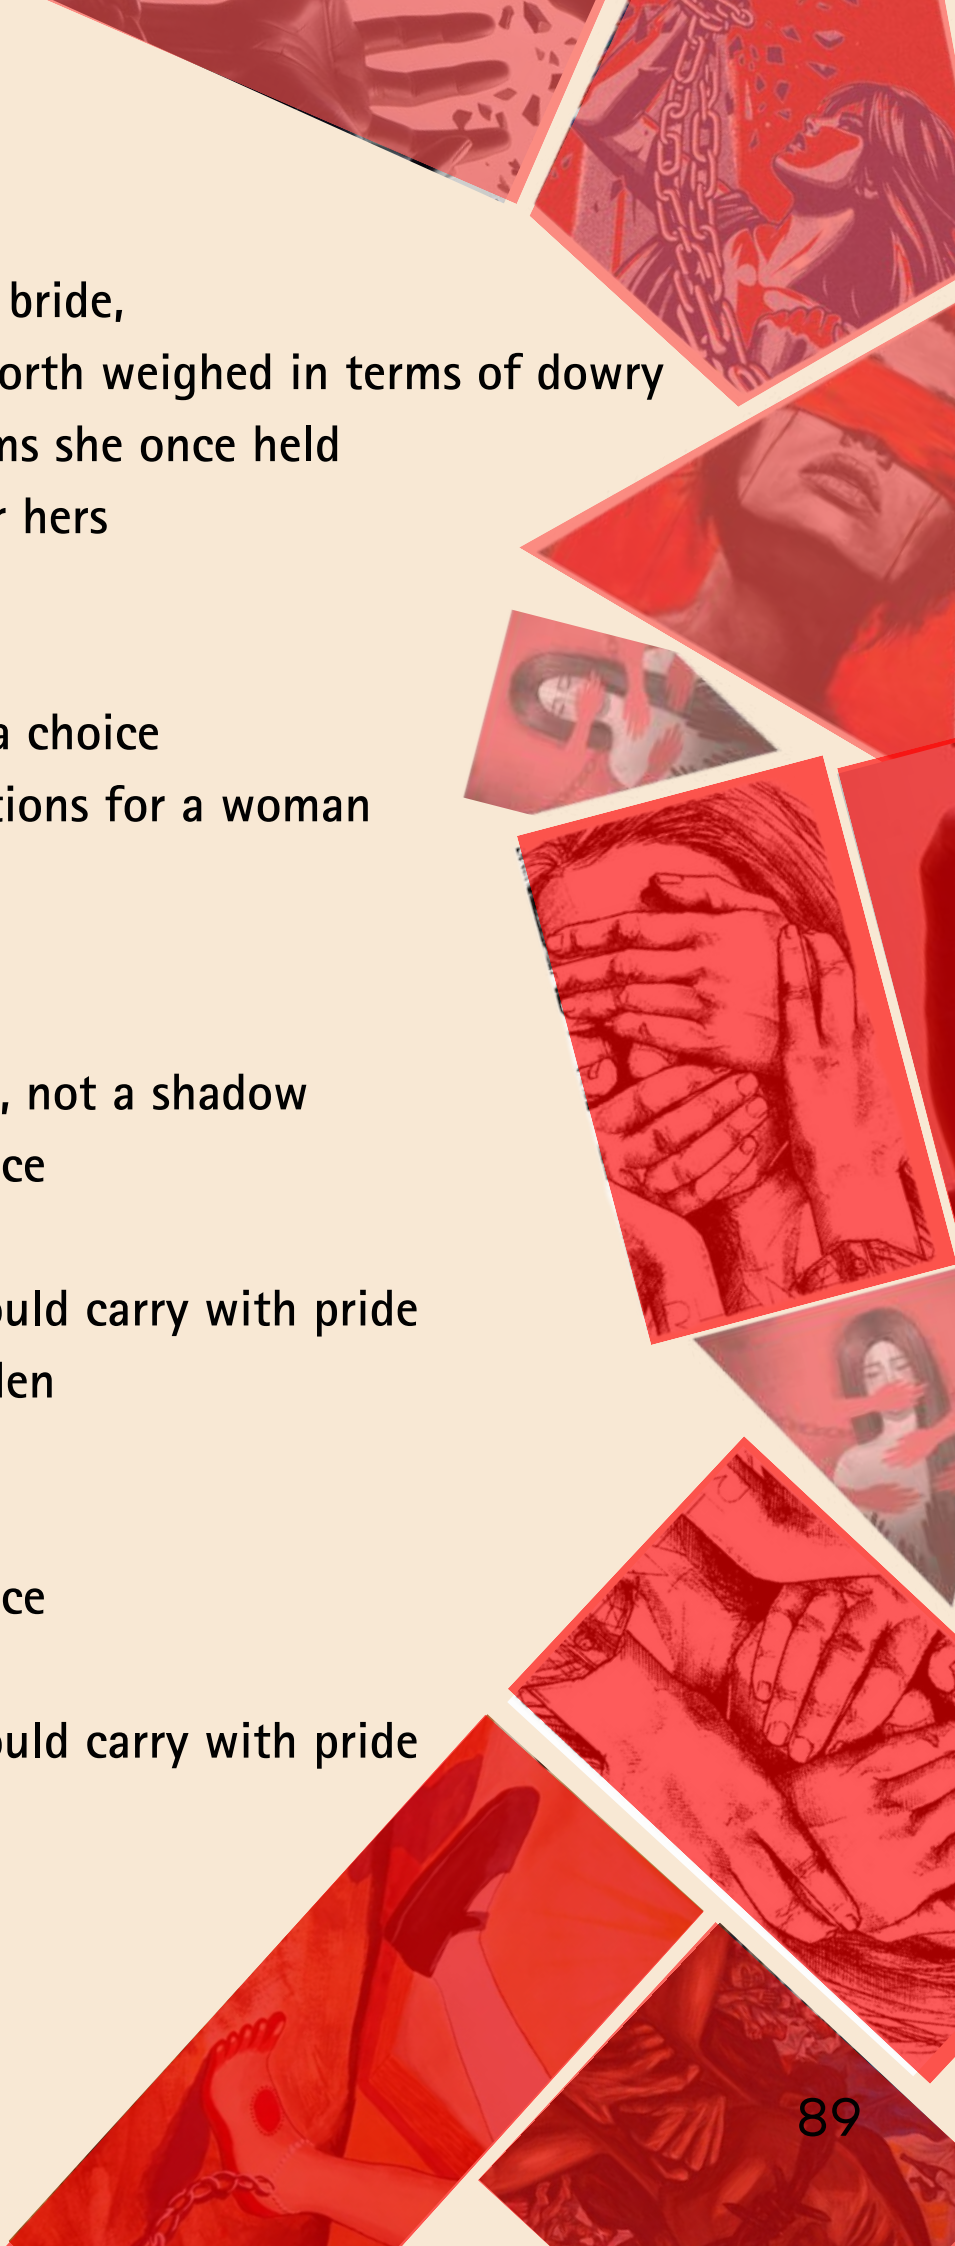
They said the chains were traditional–
Soft words wrapped around rigid rules

These were never only on her hands,
But on her voice too
Not all shackles make a sound,
Some are quietly stitched into the fabric of a girl's name
"Don't laugh like that" they said,
"Girls should be gentle"
"Don't go out this late" they said,
"Stay home and clean"
So she learns to fold her dreams
A girls learns early –
To walk slower, speak softer
And let her brother dream louder
The world hands him the road,
And leaves her with a window

To watch where it leads
Inside the walls she called 'home'
She carries invisible labor,
work that never earns a name
Her safety is a question
Asked every time the sun sets
Streets turn into cages
Eyes turn into warnings
And hence fear walks beside her

One day she is dressed as a bride,
Only to acknowledge her worth weighed in terms of dowry
gold heavier than the dreams she once held
Her body too was no longer hers
It becomes a command-
"Give birth", they say
As if motherhood was not a choice
Freedom comes with conditions for a woman
"Come home early"
"Don't speak too much"
"Don't rise too high"
"Don't go alone" am a wife, not a shadow
I am a mother, not a sacrifice
These names are not chains
But stories that women should carry with pride
I am a daughter, not a burden

I am a wife, not a shadow
I am a mother, not a sacrifice
These names are not chains
But stories that women should carry with pride



From Idea to Impact:
Our YIP State-Level Journey

Gopika MB
S2 IT

The Young Innovators Programme (YIP) is a dynamic initiative that promotes innovation and problem-solving among students. The scope of YIP goes beyond academics, encouraging learners to identify real-world issues and develop practical, technology-based solutions. It provides mentorship, exposure, and opportunities to transform ideas into impactful projects that benefit society.

As part of this programme, our team focused on a pressing local issue—the accumulation of plastic waste in canals, especially near railway areas. This leads to pollution, unpleasant surroundings, and health risks. Our idea is to develop an AI-based system that can automatically detect and collect plastic waste from canals, reducing human effort and improving cleanliness in a safe manner.

The journey in YIP helped us enhance our creativity, teamwork, and presentation skills. With proper guidance and continuous improvement, we refined our idea and presented it effectively. We are proud to have been selected for the state-level evaluation, which recognizes our innovation and dedication. This achievement motivates us to further develop our solution and contribute towards a cleaner and healthier environment. YIP has truly inspired us to think beyond textbooks and become responsible innovators for the future.

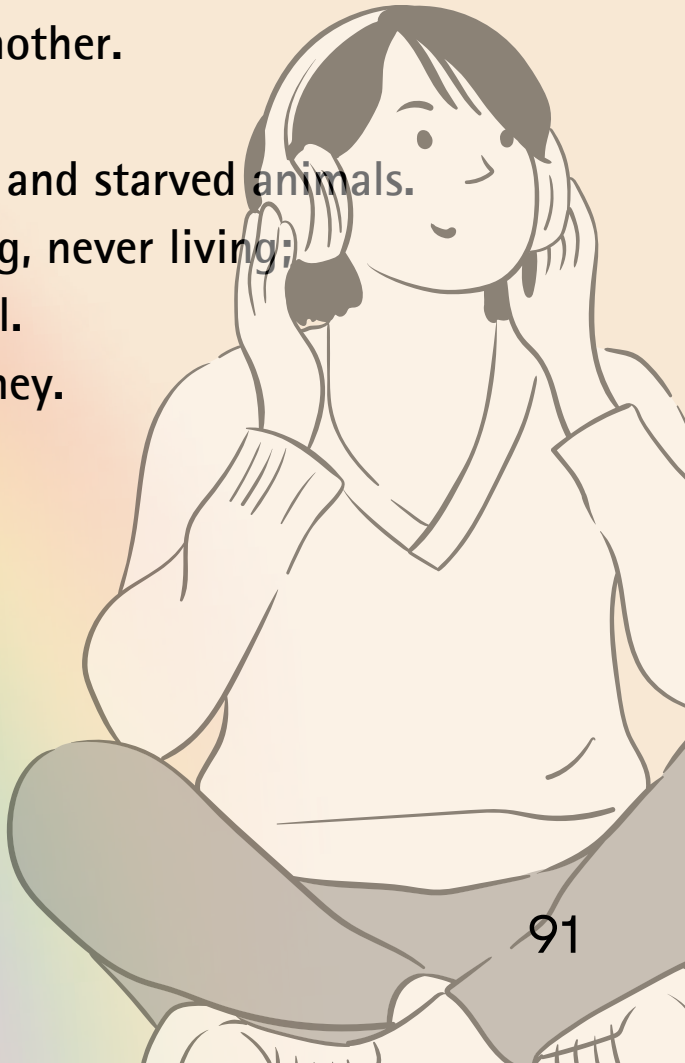
RAINBOW

Gopika GS
S2 IT

In the picture of my life,
Is blended the shades of a journey,
Frozen in but a vague moment of eternity.
In my solitude I seek, in my sadness I weep
For memories lost racing through time.

I search within myself,
Awakening colours long faded.

In the white, I see virgin earth in all her purity.
In the blue, I see the eternal sky and endless oceans.
In the green, I hear the cry of each tree fallen.
In the red, I feel my throbbing heart;
I see hands stained with the blood of another.
In the yellow,
I feel the scorching heat of baked earth and starved animals.
In the grey, I see neglected lives, existing, never living;
In the grey lies the loneliness of my soul.
In the black, I sense the end of my journey.



My Journey with NexForz & Zelbytes

Sherin Reeba Mathew
S6 IT

My professional journey began with NexForz Ressync Pvt Ltd, where I joined as an App Development Trainee. During this period, I gained valuable hands-on experience and real industrial exposure. Working on practical projects helped me understand how technology solutions are developed and implemented in real-world scenarios. This experience not only strengthened my technical skills but also improved my confidence in handling responsibilities.

Later, I was selected as the HR Manager at NexForz. This role gave me the opportunity to explore the organizational and management side of a company. I learned how to coordinate with team members, manage responsibilities efficiently, and handle important documentation. One of my major responsibilities was preparing agreements between the company and trainees. Drafting and managing numerous agreements helped me understand the importance of clarity, professionalism, and proper documentation.

Balancing these responsibilities along with my academic commitments, especially during examination periods, was challenging. However, it helped me develop strong time-management skills and the ability to manage multiple responsibilities simultaneously.

As my journey continued, I was promoted to the role of Chief Operating Officer (COO) at NexForz. This milestone marked an important step in my professional growth, allowing me to contribute more actively to the organization's operations and development.

Alongside this, I currently serve as the Head of Finance (HOF) at Zelbytes Pvt Ltd. In this role, I work on preparing audit reports for company bills. The process involves carefully reviewing and documenting a large number of bills and ensuring that every detail is properly recorded. These reports are verified by a Chartered Accountant (CA), which makes accuracy and attention to detail extremely important.

Handling large volumes of financial records requires patience, focus, and a systematic approach. Through this experience, I have developed a deeper understanding of financial auditing, documentation, and accountability.

Overall, these experiences have helped me grow both professionally and personally. They have taught me the importance of dedication, responsibility, teamwork, and continuous learning in building a meaningful professional journey.

Lilith

Layana Santhosh
S2 IT

Who thou? quoth the child.
I whimpered, yet no drops of sorrow fell on the ground I was made.
The colour of my lips matched my eyes, so bright and dark...
I walked towards the lake, but all I could see was the darkness.
Oh, how could I seemingly forget... the sun only has one wife known to you, the lotus.
Hey Lord, wasn't I created the same day as
him? Our skin the same, our blood red, yet he was the sun, 'the brightest in the sky,' and I
was the Moon, 'full of craters and dirt.'
I tried to rise up like the sun, yet you chained me in the name of my children.
You wanted him to lay beneath me... but wasn't I one independent woman?
I broke the chain and tasted the forbidden fruit of freedom.
Is it because of that, my Lord, I was eyeless to the Earth?
The sun and the lotus lived an ecstatic life, and
who was I? The magnificent moon I was! So I stole his rays and wore them... I am Lilith, my
child!

A Foggy Escape to Ponmudi – A Trip to Remember

Nada Ashraf
S2 IT

Trips usually begin with excitement, but for me, this one began with a sleepless night. The night before our Ponmudi trip, sleep completely avoided me. Ironically, I'm someone who never wakes up early, but that morning felt different. Somehow, I woke up before the alarm, full of energy, and became the unofficial wake-up caller of us all.

By 8:00 a.m., we had boarded our bus, laughter already filling the seats. The journey itself felt like a promise of something special. As the hours passed, the noise of the city slowly faded away. By noon, we reached Ponmudi, and the moment we stepped out, nature welcomed us in the most magical way.

The climate was breathtaking. Cool air brushed against our faces, thick fog floated lazily around the hills, and the entire region l ooked like it had been painted in soft shades of green and white. The mist wrapped the hills like a blanket, making everything feel calm, dreamy, and unreal. Every turn revealed vast hilly landscapes,hidden rocks, and winding paths that made us feel tiny yet alive.

We explored almost every rock and hill we could, carefully climbing, laughing, and pausing often,
mostly to admire the view or take photos. Hunger eventually led us to a small café,
where warm food tasted extra special in the cold weather. Sitting together, sharing food and stories,
felt as comforting as the climate itself.

Time, as always, moved faster than we wanted. By 4:00 p.m., we boarded the last bus back,
carrying phones full of photos and hearts full of memories. The return journey was quieter but happier,
filled with smiles, shared videos, and that silent feeling of "we'll remember this forever."

Ponmudi wasn't just a trip.
It was fog, friendship, laughter, and a break from routine, spent wholeheartedly together.

Between Deadlines And Dreams

Adithya V Sankar
S2 IT

Between deadlines and dreams, I stand,
With half-built codes and coffee in hand.
Assignments whisper, "Due tonight,"
While sleep fades softly out of sight.

Lectures pass like drifting air,
Some I follow, some I stare.
Pages filled, yet mind unsure
Of what is truth and what is blur.

In crowded halls, I lose my way,
Yet find myself in bits each day.
Not just in marks or grades I chase,
But in every fall I slowly face.

Circuits fail and programs crash,
Confidence breaks in a single flash.
Yet somewhere deep, a spark remains,
Quietly fighting through the strains.

For I am more than what I score,
More than sleepless nights I bore.
A work in progress, still I grow,
Through every high and every low.

And maybe one day, I will see
What all these years have made of me.

Beyond the Rush

Samuel Samson
S2 IT

The syllabus tells us exactly what to study and when. What it doesn't tell us is how tiring college can feel sometimes. Recently, I went to a small hill near my place. I was standing on the remains of what looked like old, abandoned houses. Nothing fancy, just broken walls and quiet surroundings. From there, I could see everything below—trees, houses, roads, people going about their day. It was calm in a way college rarely is.

Up there, there were no deadlines, no attendance worries, no pressure to do better than yesterday. Just silence.

It made me think about our department and how days quietly fill up. Even when we stay in the same classroom for hours, the pressure doesn't really leave. There's always an exam coming up, a schedule to follow, or a university deadline waiting ahead.

Between internal tests, practicals, and evaluations, it becomes easy to focus only on what's next and forget to pause and check how we're actually doing.

That place didn't expect anything from me. It didn't care about marks or productivity. Standing there, I realized how rare it is to just pause without feeling guilty.

College teaches us a lot of skills, knowledge, discipline. But it also teaches us things that aren't written anywhere: how to handle pressure, how to deal with failure, and how to keep going even on difficult days.

Maybe learning isn't only about moving forward all the time. Maybe it's also about stopping once in a while, taking a breath, and then coming back with a clearer mind.

Because long after we forget some lessons, we'll remember moments like these—the quiet ones that helped us understand ourselves a little better

A Loop Without Answers

Nandana R
S2 IT

I don't know who I am,
just a name, a face, a story unfinished.
Sometimes I wonder—
why was I born into a world
where everyone seems to know their path,
except me?

Questions sit quietly in my mind—
What is my aim?
What is my dream?
But the answers never come,
only silence does.

Since the day I opened my eyes,
I was handed expectations—
heavy, unseen, unspoken.
And now I walk in circles,
in a life that feels like a loop,
repeating, repeating, repeating...

Are we living,
or just existing like machines
trained to follow?

It feels like a burden—
one no one talks about,
one no one hears.

And somewhere in all of this, I ask—
how do we heal
when we don't even understand
what broke us?

Maybe the truth is,
we never stop to realize.
We just keep moving,
pretending to be fine,
hoping one day
it will all make sense.

Quantum Computing: A New Chapter in the Story of Technology

Alex Anto
S4 IT

When I first heard the term Quantum computing, I thought it was just science fiction a concept only physicists would understand. But the more I read about it, the more I realized it's not some far-off dream. It's real, it's happening, and it might just change the world as we know it.

So what exactly is quantum computing? And why should we, as engineering students, care?

Let's explore.

From Bits to Qubits: The Big Shift

All our current computers from our laptops to supercomputers work on bits, which are like tiny switches that are either ON (1) or OFF (0). Everything from WhatsApp messages to Netflix videos is built using just these 0s and 1s.

Quantum computers, however, use something called qubits. And here's where things get a bit mind-bending: a qubit can be 0, 1, or both at the same time. This strange behavior is called superposition. There's another quantum phenomenon called entanglement, where two qubits become linked, and whatever happens to one instantly affects the other even if they're far apart.

Together, these two properties allow quantum computers to process information in a way that classical computers simply can't.

But Why Does It Matter?

Let's say you're trying to crack a really tough math problem. A classical computer might take millions of years. But a quantum computer could solve it in minutes.

This could have huge implications:

- Drug discovery
- Finance & logistics
- AI and machine learning

India's Role in the Quantum Race

India is not sitting on the sidelines. With the launch of the National Quantum Mission, the country is investing heavily in quantum research and development. Top institutions like IISc, TIFR, and IITs are already exploring quantum technologies.

Ready to Get Started

Watch videos, join online communities, or take short courses on platforms like Coursera.

Conclusion

Quantum computing isn't some distant future, it's already happening. And while we're still figuring it out, it's clear that it will change everything from modern science.

For students like us, this is more than just a trending topic, it's an opportunity.

Digital Twin:
When the Real-World Gets a Virtual Partner

Manu M
S4 IT

Imagine if you had a virtual version of yourself that could predict when you might fall sick, suggest improvements to your daily routine, or even help you perform better—all without any risk. Sounds futuristic, right? This is exactly the idea behind Digital Twin, one of the most exciting technologies emerging in the IT industry today.

What is a Digital Twin?

A Digital Twin is a virtual copy of a real-world object, system, or process. But it's not just a static model—it keeps updating itself using real-time data. This means the digital version behaves almost exactly like its real-world counterpart.

For instance, in a smart factory, machines are connected to sensors that constantly send data. This data is used to create a digital twin of the machine, allowing engineers to monitor its condition, detect issues early, and improve performance—all without stopping production.

Why is it Important?

In simple terms, Digital Twin helps us understand before we act. Instead of waiting for something to fail, we can predict problems and solve them in advance. This saves time, reduces costs, and improves efficiency.

Think about how useful this could be:

- Doctors testing treatments on a digital model of a patient
- Engineers checking how a bridge will behave under stress
- Cities managing traffic and energy smarter

It's like having a safe testing ground for real-world decisions.

Where is it Used?

Digital Twin technology is already making an impact in many fields:

- Healthcare – Personalized treatment and patient monitoring
- Smart Cities – Better traffic control and energy usage
- Manufacturing – Predicting machine failures before they happen
- Automobiles – Virtual testing of vehicles
- Aerospace – Monitoring aircraft performance and safety

The Advantages

What makes Digital Twin so powerful?

- It helps prevent failures before they occur
- Reduces maintenance costs
- Improves system efficiency
- Supports smarter decision-making
- Minimises risks by testing in a virtual environment

Challenges to Overcome

Like any new technology, it's not without challenges:

- High setup cost
- Data privacy and security concerns
- Complexity in managing real-time data
- Need for advanced infrastructure

What Lies Ahead?

The future of Digital Twin is incredibly promising. With the rise of AI, IoT, and faster networks like 5G, digital twins will become even more accurate and widely used. We may soon see digital replicas of entire cities—or even human organs—helping us solve complex problems more efficiently.

Final Thoughts

Digital Twin is more than just a technological concept—it's a new way of thinking. By connecting the physical and digital worlds, it allows us to predict, improve, and innovate like never before.

As students stepping into the world of technology, understanding concepts like Digital Twin gives us a glimpse into the future we are about to build.

Edge AI: Transforming Real-Time Intelligence in the IT Industry

Akhil
S4 IT

Introduction

Edge AI refers to the deployment of artificial intelligence models on edge devices such as IoT sensors, cameras, and smartphones. Unlike traditional cloud computing, Edge AI processes data locally, enabling faster decision-making and reducing dependency on internet connectivity.

With the rise of IoT, the amount of data generated is massive. Sending all this data to cloud servers increases latency and bandwidth usage. Edge AI solves this problem by analyzing data at its source.

Architecture of Edge AI

Edge AI architecture consists of three main components: edge devices, edge gateways, and cloud systems. Edge devices collect and process data, gateways manage communication, and cloud systems handle training and storage. Inference occurs at the edge, while model training is usually performed in the cloud due to higher computational requirements.

Working of Edge AI

The process begins with data collection from sensors. The data is then preprocessed to remove noise and improve quality. A trained AI model performs inference locally and generates results instantly.

If necessary, selected data is sent to the cloud for further analysis and improvement of AI models.

Advantages

Edge AI offers real-time processing, which is essential for applications like autonomous vehicles and industrial automation.

It enhances privacy as sensitive data remains on the device. It also reduces bandwidth usage and operational costs.

Edge AI systems are more reliable because they can function even with limited or no internet connectivity.

Applications

In manufacturing, Edge AI is used for predictive maintenance and quality control. In healthcare, it enables real-time monitoring through wearable devices. Autonomous vehicles use Edge AI to detect obstacles and make instant decisions. Retail uses it for smart checkout systems and customer analytics. Smart cities use Edge AI for traffic management, surveillance, and energy optimization.

Challenges

Despite its advantages, Edge AI faces challenges such as limited hardware resources and the need for optimized AI models. Security risks arise due to physical access to devices. Managing large-scale deployments of edge devices can also be complex.

Future Trends

The future of Edge AI includes integration with 5G networks, enabling ultra-fast communication and real-time analytics.

Technologies like federated learning allow multiple devices to learn collaboratively without sharing raw data.

There is also a growing focus on energy-efficient AI models for battery-powered devices.

Conclusion

Edge AI is revolutionizing the IT industry by enabling real-time intelligence at the source of data generation. It improves efficiency, enhances security, and reduces costs.

As technology evolves, Edge AI will become a critical component of modern digital systems, supporting innovations in various industries.

The Champions' Chronicle

SARGAM 2026 – The Golden Reign of the Department of Information Technology

The Department of Information Technology scripted history at Sargam 2026, emerging as the Overall Department Champions with an outstanding 1082.5 points. Through exceptional performances across music, dance, literature, theatre, fine arts, and cultural events, the department demonstrated that excellence is achieved through talent, passion, dedication, and teamwork.

Alongside securing the Overall Championship, the department also claimed the festival's highest individual honours, with M. S. Gauri Sankar (S4 IT) being crowned Kalaprathibha, while Goury Vibin (S4 IT) and Sreya S. S. (S6 IT) jointly secured the title of Kalathilakam.

The department dominated the dance stage with victories in Fusion Dance, Bharatanatyam, Vattapaatu, and several other group performances. In music, IT students excelled in Western Vocal, Classical Music, Ghazal, Guitar, Drums, Mridangam, Vrindhavaadhyam, Band, and Group Songs, proving their mastery across diverse musical traditions.

The literary arena was equally impressive, with victories in Essay Writing, Story Writing, Poem Writing, Extempore, Debates, JAM, Kavyakeli, and Recitation, showcasing the department's intellectual and creative excellence. Fine arts brought further laurels through outstanding performances in Digital Painting, Pencil Drawing, Cartoon, Face Painting, Photography, Calligraphy, Pot Decoration, Embroidery, and Clay Modelling.

Behind every medal stood countless hours of practice, determination, and mutual support. Whether on stage or behind the scenes, every participant contributed to the department's success. The collective spirit of teamwork transformed individual talents into a championship-winning performance.

The Department of Information Technology extends its heartfelt appreciation to every participant, faculty member, staff member, coordinator, volunteer, and supporter whose encouragement made this remarkable achievement possible. This victory belongs not only to the prize winners but to the entire IT family that stood together throughout the festival.
Sargam 2026 will be remembered as a defining chapter in the department's cultural journey—one that celebrated excellence, unity, and the collective spirit of the IT family.

Future Vision

As we look ahead, ALTIORA aspires to grow beyond a magazine into a vibrant platform for innovation, expression, and collaboration within the Department of Information Technology. Our vision is to continuously encourage students to explore ideas that bridge technology with creativity, addressing real-world challenges with thoughtful solutions.

We aim to expand the scope of this publication by incorporating more technical insights, research-based articles, and interdisciplinary perspectives, while still preserving the space for artistic and personal expression. By doing so, ALTIORA will serve as a balanced reflection of both the analytical and creative strengths of our students.

In the future, we envision ALTIORA as a recognized platform that not only documents achievements and ideas but also inspires new ones. We hope it becomes a medium where students confidently share their voices, collaborate with peers, and contribute meaningfully to the ever-evolving world of technology.

Arjun V S

With continued support and participation, ALTIORA will keep evolving—just like the field of Information Technology itself—driven by curiosity, innovation, and the spirit of learning.

Acknowledgements

The successful publication of ALTIORA has been made possible through the collective efforts and support of many individuals. We extend our sincere gratitude to the Head of the Department, faculty members, student contributors, and the editorial team whose encouragement, guidance, and dedication helped bring this magazine to life.

We would also like to thank all students who contributed articles, reports, achievements, photographs, and other content featured in this magazine. Their enthusiasm and willingness to share their experiences have enriched these pages and made ALTIORA a true reflection of the Department of Information Technology.

Special appreciation is extended to everyone who worked behind the scenes in planning, compiling, editing, designing, and reviewing the magazine. Every contribution, no matter how small, played an important role in shaping this publication.

As we present this magazine, we look forward to the continued support and participation of our department community in the years to come. May ALTIORA continue to celebrate achievements, inspire innovation, and preserve the stories that define our journey.
